Easy Eco Tip from A Rocha, Eco church

Tackle climate change and reduce your heating bills by finding and reducing the draughts in your home. Find the gaps that let cold air in and warm air out (keyholes, letterboxes and gaps around windows, doors, loft hatches and floorboards for example). Do what you can to fix these gaps - there are lots of tutorials on how to do this online. It's also a good time to prepare for winter by putting radiator reflector foil or baking foil behind the radiator. This will reflect heat back into your room.

WE ARE LOOKING FOR YOUR HELP IF POSSIBLE!

Next March the lease on our house comes to an end and we are starting the process of looking for a new home. We are looking to either rent in Fritchley or Crich. If anyone knows of a house/bungalow that would be available for long term let, we would be extremely grateful if you would let one of us know. Many thanks

CRICH GLEBE SURVEY

In order to help plan future use of the Glebe and make sure that it is relevant for you and your family's needs the centre is conducting a survey and trying to get as many responses as possible. Surveys are on www.crichglebe.org/survey or printed copies can be collected from the Glebe office. Its very short (c. 14 questions) and your thoughts would help enormously. Thanks!
