

A DATE | FOR YOUR DIARY

THURSDAY 20th AUGUST

Members Exmouth u3a, Exmouth Coastal Churches, and the wider community are warmly invited to a screening of *People's Emergency Briefing*, a 50-minute film exploring the risks to British life and the UK economy from damage to nature and the changing climate.

The screening will take place at Holy Trinity Church on Thursday 20 August. Refreshments will be available from 10am, followed by the screening.

The film includes footage from last November's National Emergency Briefing, where leading UK experts spoke on climate science, food security, health, economics, national security and nature.

It gives a clear overview of how the climate and nature crisis is affecting daily life in Britain, the risks ahead and the practical responses available.

The screening will be followed by a discussion on what these issues mean for our community and what we can do to look after God's creation.

The film screening is free, supported by Exmouth Coastal Churches.
