

September 20th Kitchen works update from Rev. Malcolm

You will see quite a change tomorrow, the bare kitchen unit were installed today, these will be getting electrics and water installed, then worktops and finally decorative cladding to match the church. We have also made some headway in getting the drainage pump installed outside the church, and have water and the power cable now in the units, just ready for connection to the various mains at the east end. Apologies if anything is a bit dusty, we were in after the church cleaners, and however tidy you try and be, these works do generate a bit of dust and mess. I am very hopeful that we will have a working, if not absolutely complete kitchen this year.
