A prayer for Ukraine

God of peace and justice, we pray for the people of Ukraine today. We pray for peace and the laying down of weapons. We pray for all those who fear for tomorrow, that your Spirit of comfort would draw near to them. We pray for those with power over war or peace, for wisdom, discernment and compassion to guide their decisions. Above all, we pray for all your precious children, at risk and in fear, that you would hold and protect them. We pray in the name of Jesus, the Prince of Peace. Amen

Eco Tip of the week

The bathroom is a commonly overlooked source of carbon savings. Our tips this week help you reduce the impact of your bathroom:

1. Use bar soap and shampoo - Drinking water is not the only source of plastic bottles, the bathroom is full of them. Although we are increasingly better at recycling our waste in the kitchen and outside, we recycle only 50% of our bathroom packaging. Using bar alternatives reduces your plastic waste and can often save you money as the bars often last longer than the bottled alternative.

2. Take shorter showers - During this cold weather, the warmth of a nice long shower is particularly appealing - especially in the morning. Yet, this can be a quite carbon intensive habit. Having a 15 minute shower every day for a year can produce between 164 and 450kg CO₂e depending on your boilers fuel and efficiency. Reducing your shower time to 5 minutes cuts this by two thirds, saving you around 110 to 300kg CO₂e!
