Eco Tip of the week

This sun is capable of giving us more than just this heatwave!

1. Solar PV (photovoltaic) - By producing renewable electricity through your own solar PV, you will reduce your demand on electricity from the grid. Grid electricity has a much higher carbon footprint due to the contribution of fossil fuels. Using solar powered electricity saves you 3.84 kg CO₂e per 10 kWh (equivalent to running a 100 W bulb for 100 hours).

2. Solar thermal - Solar thermal uses the sun to heat your water, reducing the amount of energy required for you to use hot water. Similar to solar PV, this reduces the cost of your bills and saves you carbon - every 10 kWh of natural gas use prevented by using solar saves 1.84 kg CO₂e.

So why not take a little time to consider if solar power can work for you to help reduce your footprint.

The People's Emergency Briefing
is a film highlighting the climate and nature crisis we are facing, and how we can effectively respond.

*It will be screened at
**All Saints Parish Church
on Sunday 5th July at 3.30pm***

Refreshments will be served from 3pm
Rt Rev Graham Usher, Bishop of Norwich and lead Bishop for Environment for the Church of England said "I encourage churches to invite their wider community and show this film – it's a wake up for us all. Its message to care for climate, people, nature is so urgently needed, not least so that we might live and act as Jesus would have us be.

Please try to attend, if you are able and invite your friends.

A prayer for Ukraine

God of peace and justice, we pray for the people of Ukraine today. We pray for peace and the laying down of weapons. We pray for all those who fear for tomorrow, that your Spirit of comfort would draw near to them. We pray for those with power over war or peace, for wisdom, discernment and compassion to guide their decisions. Above all, we pray for all your precious children, at risk and in fear, that you would hold and protect them. We pray in the name of Jesus, the Prince of Peace. Amen
