A Prayer for Iran

A prayer by the Rt Revd Dr Guli Francis-Dehqani, Bishop of Chelmsford.

*Ever-loving God,
who hears us in our anguish and distress, and longs for us to be free.
We pray for the people of Iran and the wider Middle East, at this time of fear and uncertainty.
Be near to those who are anxious; bring comfort to all who are suffering.
Guide those with the power to make decisions, and lead them in the ways of wisdom, compassion and moderation: that people of goodwill would seek harmony and reconciliation.
Join us with our Christian brothers and sisters in all places,
in praying for peace with justice, through him who is the prince of peace, Jesus Christ our Lord.*

Ministry Team

John Roberts
Margaret Roberts
Vince Ryder

A prayer for Ukraine

God of peace and justice, we pray for the people of Ukraine today. We pray for peace and the laying down of weapons. We pray for all those who fear for tomorrow, that your Spirit of comfort would draw near to them. We pray for those with power over war or peace, for wisdom, discernment and compassion to guide their decisions. Above all, we pray for all your precious children, at risk and in fear, that you would hold and protect them. We pray in the name of Jesus, the Prince of Peace. Amen

Eco Tip of the week

This record long heatwave is threatening our water supplies! We need to conserve water—here are some ideas:

1. Use a watering can - Hosepipes use 540 litres an hour! The majority of this water will be wasted so by using a watering can for your plants and a bucket for your car (ideally collected from your water butt) you can use water much more efficiently. It helps you to use only the water you need, and also to ensure your water usage is targeted more directly at the plants/car.

2. Water in the morning or evening - Being strategic with the watering can also play a part in reducing water use. When watered in the heat of the day, a lot of water is lost through evaporation. By watering in the early morning or in the evening, you can ensure that less water is lost which will mean you'll need to use less water to keep your plants happy.
