

Story of the Wise Men Part 4

On reaching Woolsthorpe Manor they had tea with Isaac Newton,

where the wise men told about their adventures and how they were going east following the star to visit the baby Jesus. Isaac Newton showed them his new telescope which helps locate the stars and the planets.

The wise men were very impressed but had many other questions. For example how could they promote the news of the baby Jesus across the world. Isaac Newton suggested that they needed to visit the Colossus computer. The wise men explained that they did not want to divert back to Bletchley Park. However Isaac Newton told them about a special exhibition at Southwell minster.

However the camels were not as impressed as they had travelled enough. Isaac newton suggested the Bubble car museum might be able to help.

The journey continued to the Bubble car museum where the camels could then rest in the fields and the wise men continued their journey.
