

# St Mary & St Margaret Church, Stow Maries

---

## Restoration Appeal: The Next Push

For centuries, our church has stood as a beacon of faith and community. Today, we are in the midst of a vital journey to preserve its future.

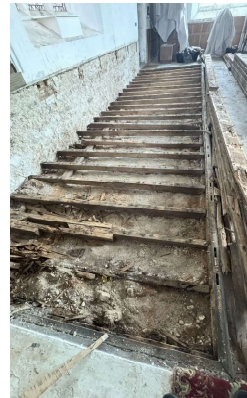

### Our Progress So Far

Thanks to your generosity, we have already been able to replace the stolen lead on the roof with stainless steel, ensuring the building is once again protected from the elements. The ceiling also required full renewal, which has now been completed with new lath and plaster.

### The Next Challenge: The Floor

As we moved to the next phase of restoration, we discovered that the entire floor structure is severely rotten. The joists and floor boards must be replaced entirely before we can safely re-install the pews and open the church for community activities and worship.

### How You Can Help

We are launching this next appeal to fund the floor replacement and the re-installation of our pews. Every contribution, no matter the size, brings us closer to completion.
