

## **REDUCE, REUSE, RECYCLE**

*In 2023 we successfully applied for a grant from Kirklees Council to increase our recycling offer for the benefit of the wider community.*

*This allows us to offer a **Medicinal Packaging Recycling Box***

*It's the ideal zero waste solution, avoiding unnecessary landfill usage.*

***We can accept EMPTY:***

- 🕒 ***Medicinal blister packs***
- 🕒 ***Plastic Pill bottles***
- 🕒 ***Plastic Vitamin bottles***

*Once the bin is full, it is sent to a processing plant in Hull that recycles and reuses the plastics to make outside furniture and garden items. There is a cost involved and although the grant will cover initial costs, we are asking donors for a small financial donation to enable us to sustain the service into the future.*

--

*Note: We twice trialled offering an additional bin (2023-25) for other hard to recycle plastic items but this was unsuccessful due to wrong items being added to the bin. This waste could then not be sent for recycling.*
