

7.00 - SUMMARY

- This proposal is an extension to St Bridget's Church, integrated with the existing building, providing an accessible toilet and baby changing facility for public use. The works will also include adding a tea-making station so that guests and staff can have access to kitchen facilities.
- The extension will be a welcoming and inclusive addition to the church, allowing those with young children or mobility challenges to access toilet facilities on-site.
- The extension will sit against the North Porch and will neatly fill in the space.
- It has been designed intentionally to match the already existing building and not look out of place.
- As part of the works, we are consulting with the DAC to seek Faculty Consent and Full Planning Consent.
- Ainsley Gommon have worked closely with St Bridget's Church to agree the most appropriate solutions for improvement works.
- The proposed works will preserve the Listed Building for future years and enhance the visitor experience of this significant site.
