- **What is the St Peter's Community Vision Project?**

For many years we have wanted to improve the community facilities at S. Peter's so that it can be used by the community outside of service times. We already have some groups that use the building but would like more people to use it. However, we need a bigger, better equipped kitchen, more toilets that are accessible to everyone, a new floor and more space in the nave to give better access. We would also improve the heating system. This is a big project and will take a number of years to come to fruition but we are committed to serving our community into the future and getting the building used to its full potential.
